

IRPA-Initiative on RP CULTURE

Stakeholder Involvement and the Role of Associated Societies

Results of WG 3

presented by B. Lorenz

Radiation Protection Culture ?

**If you think about
CULTURE,
what occurs to you?**

CULTURE

CLUB

**If you think about
RADIATION PROTECTION,
what then occurs to you?**

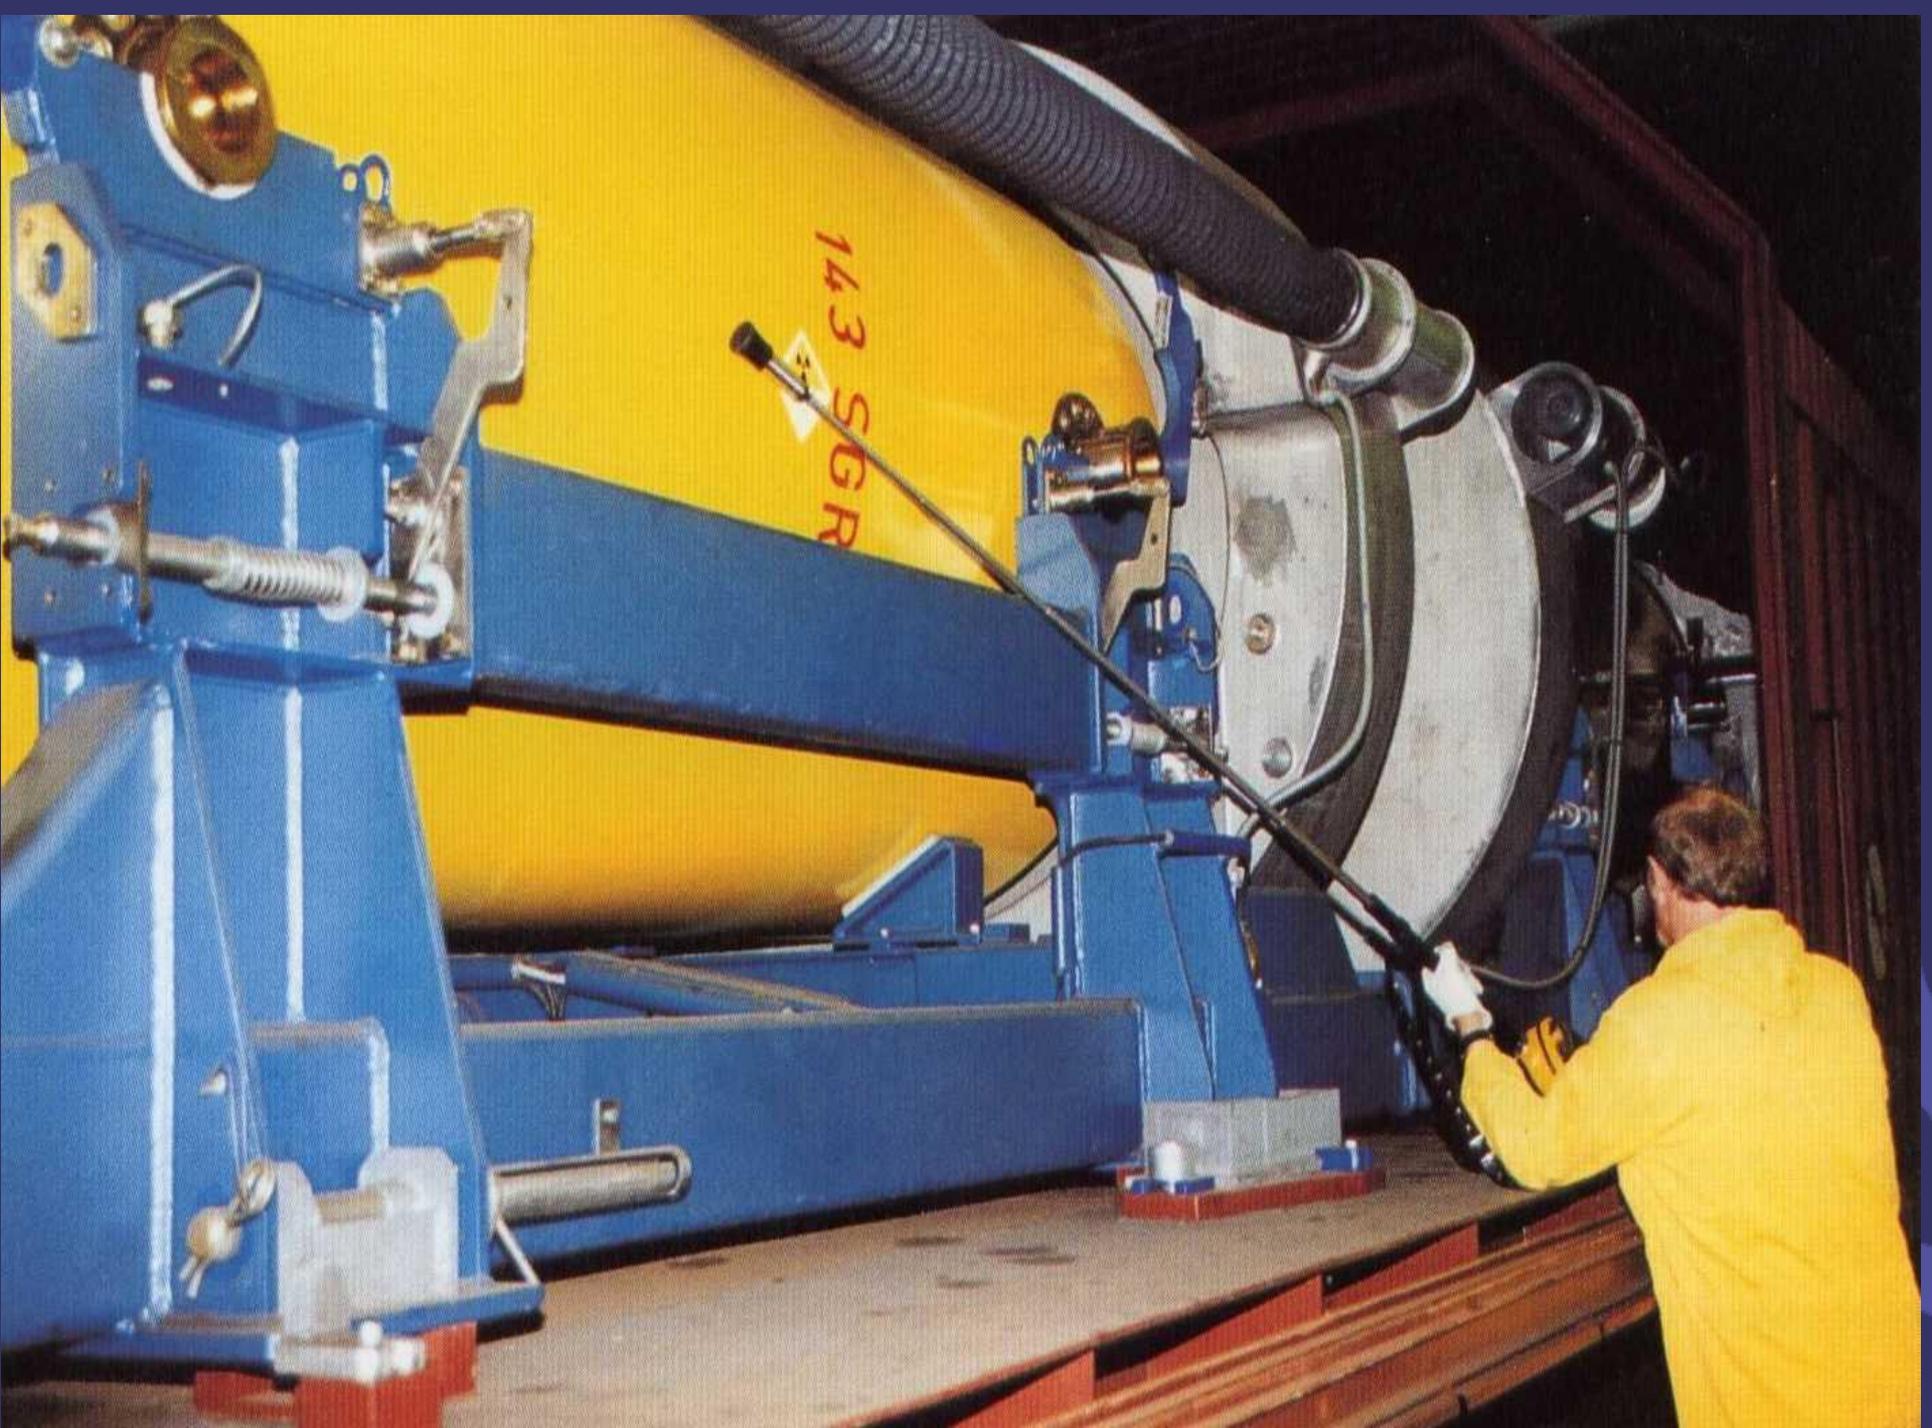

DANGER
Radiation
risk

SCIENCEphotOLIBRARY

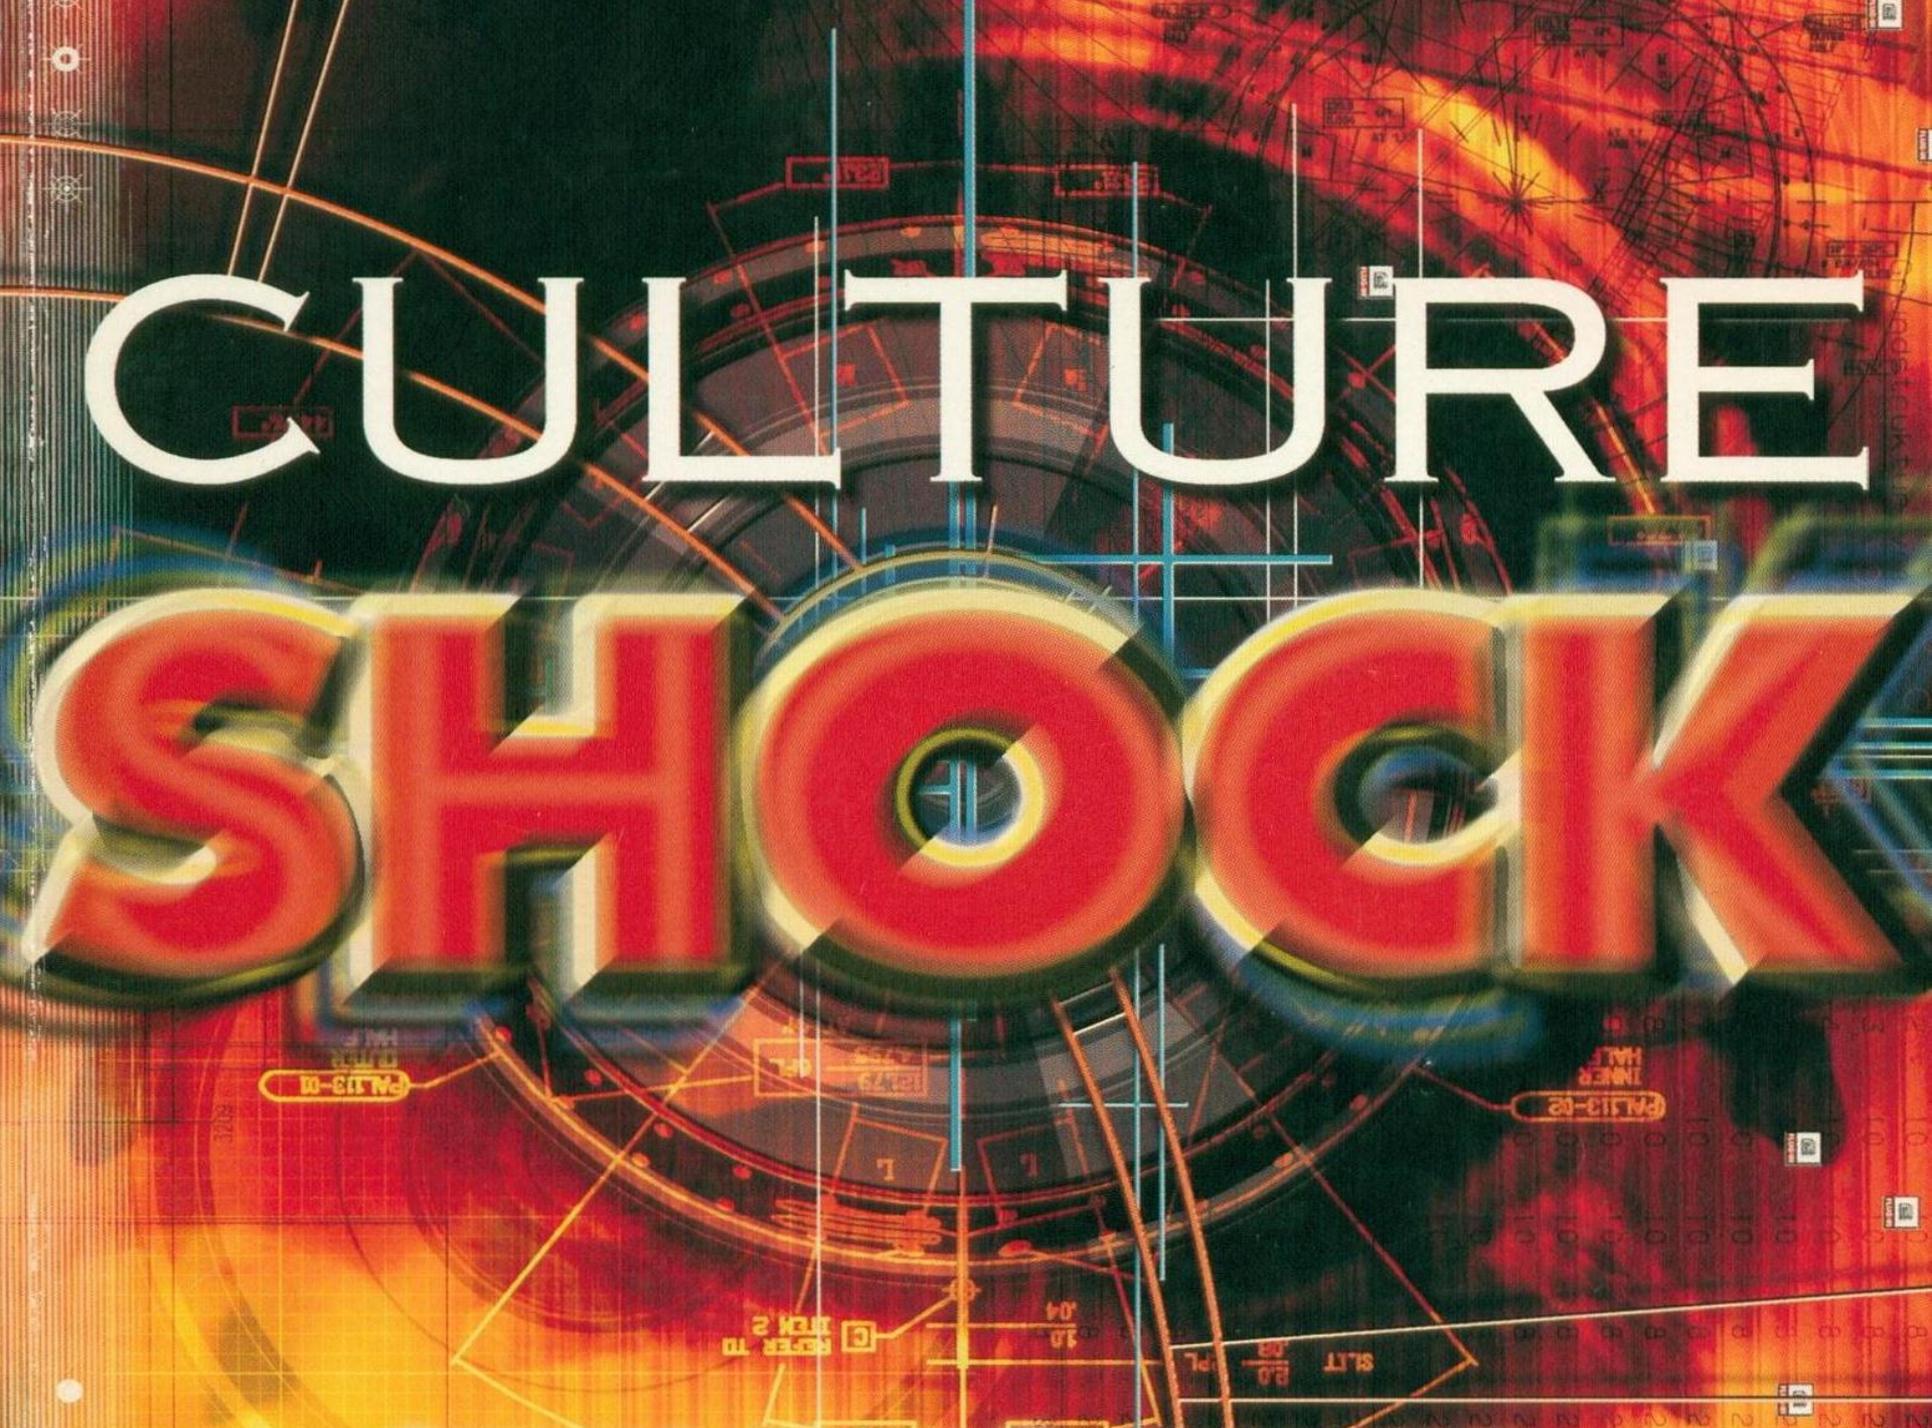

And now put these things together!

DANGER
Radiation
risk

SCIENCEPHOTOLIBRARY

CULTURE

SHOCK

To avoid this, we have to perform a stakeholder involvement and

- to explain, what we mean by RP Culture,**
- to win “you” as ally.**

WHO ARE YOU

You = RP Professionals

You = The Media

There are some more parties of interest, but do we have the capacity needed?

Stakeholder Involvement

There are a number of tools, e.g. IAEA documents and the IRPA Principles, which may help you.

In any case you need a plan, who shall do what.

Associated Societies

Culture is different around the world and so is radiation protection.

Each AS needs to find its own way.

But with the common goal

- **doing a good job as RP professionals,**
- **and being acknowledged to do so.**

If you want to find some more words about that, look at the IRPA Vision and Mission.

Thank you for your attention.
